Our Mission

As Members we will learn, educate, and encourage all people in our community, to empower people to overcome the challenges by those experiencing visual impairment and blindness, provide ways and knowledge about disabilities and living Independently fully and advocate for others.

Our History

Founded by participants of the Winter Camp for the Blind in Clear Lake, Michigan, the Clear Lake Virtual Lions Club is a digital community for the visually impaired. Despite geographical distances, we use technology to create a supportive network. The club's roots trace back to the Winter Camp, where deep connections are formed. These bonds extend into our virtual space, where members share experiences, knowledge, and resources.

Our Service

Despite being virtual, our club is deeply involved in community service. We collect eyeglasses, collaborate with local groups, and support Leader Dogs for the Blind, with three of our members being proud Leader Dog users. We also assist traditional Lions clubs, proving that digital volunteerism is as impactful as traditional methods.
